EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Smiley on 09/03/2009.

The application has been amended as follows:

Claims 1 and 3-17 are canceled.

Claim 24. (currently amended) A method for laser microdissection in a container, comprising
the steps of:

arranging a receiving portion, ~~which is designed to hold~~ holding at least one receiving element, in the container,

arranging a holding portion externally of the container,

positioning the receiving portion in the container by means of contactless

coupling between the holding portion and the receiving portion by moving the holding portion in a direction relative to the container;

holding in the container at least one receiving element for receiving a biological specimen detached by means of laser microdissection from biological material located in the container;

detaching at least one biological specimen by laser microdissection from the biological material located in the container; and

receiving the at least one biological specimen by the at least one receiving element held in the container,

wherein the receiving portion is held in the container by the holding portion by means of the contactless coupling.

2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or fairly suggest the claimed configuration of receiving element for tissue excised by laser microdissection in a closed container, said receiving element held in the container by a receiving portion, said receiving portion movable by external movement of a holding portion which is in contactless coupling with the receiving portion. The claimed configuration allows positioning of the receiving element over any specific portion of tissue in the container, a piece of which is intended for laser microdissection and capture when the excised portion is catapulted from the tissue and into the receiving element subsequent to laser irradiation from below the container.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TIMOTHY G. KINGAN whose telephone number is (571)270-3720. The examiner can normally be reached on Monday-Friday, 8:30 A.M. to 5:00 P.M., E.S.T..
